

## **Job Portal Application**

### **1. User Authentication:**

- Implement user registration, login, and logout functionality.

### **2. Job Posting Management:**

- Create CRUD operations for job postings including attributes like job title, description, requirements, and company details.
- Allow authenticated users to create, update, and delete job postings.

### **3. Job Application:**

- Allow users to apply for job postings with a form submission.
- Store application details and associate them with the respective job postings.

### **4. Admin Dashboard:**

- Create an admin dashboard to manage job postings and view applications.
- Ensure only admin users have access to this dashboard.

### **5. API Endpoints:**

- Develop API endpoints for managing applied-jobs, login, registration, job-posting, job-listing.

**Time: 24 hours (Flexible)**
